

New Jersey Green Amendment Bill

SCR43/ACR119

Haddon Grange #38

Whereas unregulated fracking and mining have caused environmental damage, and

Whereas landfills have emitted noxious odors causing illness, and

Whereas the costs of flooding and cleanup have risen causing property values to decline,

Whereas industrial sewage sludge has polluted our rivers and waterways,

Therefore the Green Amendment bill would require the state to preserve natural resources from damage and destruction, and

Therefore upon passing of the proposed amendment to the Constitution of New Jersey it will be submitted to the people as a question on the ballot at the next election,

Therefore, be it resolved that the New Jersey State Grange support the NJ Green Amendment bill that will support the rights of the people to a clean and healthy environment.
